WORK EXPERIENCE

TRUSOL - *Ahmedabad*
December - 2023 - Present
Web Developer

The job profile involves the development of backend server applications, webhooks, API integrations, and related console applications for processing resource-intensive and privileged tasks in the background. Responsibilities also include integration with frontend applications in collaboration with HTML developers. Some of the key concepts implemented are:

- Queue based Task Processing, Multi Step Form Submission, CSRF based request handling, Role Based Access Control, XLS, CSV file import and export through PHPSpreadSheet Library, and CRM systems.
- Node.Js boat for Ticket bookings and data scrapping from multiple websites at one time.
- Sending Event based Emails through Symfony Emailer Library, Form submission through AJAX, Client and Server-side Input validation through Yii2 validators, Yii2 GridView and ListView Implementations, WhatsApp Cloud API - Request handling through Webhooks and API calls for sending messages.
- WhatsApp Cloud API – Message Flow API Implementation, Real-time Chat Bot development through NodeJS & MeteorJS.
